UPL CHLOROTHALONIL

Suspension concentrate containing 500 g/l (40.4% w/w) chlorothalonil.

A fungicide recommended for the protection of winter and spring wheat and winter and spring barley against a range of diseases.

The Control of Substances Hazardous to Health (COSHH) Regulations may apply to the use of this product at work.

### IMPORTANT INFORMATION

FOR USE ONLY AS AN AGRICULTURAL FUNGICIDE

- **Crop**
  - Winter and spring wheat
  - Winter and spring barley

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.

### SAFETY PRECAUTIONS

**Operator protection**

- Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment.

  - OPERATORS MUST WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), SUITABLE PROTECTIVE GLOVES AND FACE PROTECTION (FACESHIELD) when handling the concentrate.

- OPERATORS MUST WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), AND SUITABLE PROTECTIVE GLOVES when handling contaminated surfaces.

- However, engineering controls may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection.

- WASH ALL PROTECTIVE CLOTHING thoroughly after use, especially the insides of gloves.

- WHEN USING, DO NOT EAT, DRINK OR SMOKE.

- WASH SPLASHES from skin or eyes immediately.

- DO NOT BREATHE SPRAY.

- WASH HANDS AND EXPOSED SKIN, before eating, drinking or smoking and after work.

**Environmental protection**

- Do not contaminate water with the product or its container. Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads.

- To protect aquatic organisms respect an unsprayed buffer zone to surface water bodies in line with LERAP requirements.

- This product qualifies for inclusion within the Local Environmental Risk Assessment for Pesticides (LERAP) scheme. Before each spraying operation from a horizontal boom sprayer either a LERAP must be carried out in accordance with CRD’s published guidance or the statutory buffer zone must be maintained. The results of the LERAP must be recorded and kept available for inspection for three years.

- DO NOT ALLOW DIRECT SPRAY from horizontal boom sprayers to fall within 5m of the top of the bank of a static or flowing water body, unless a Local Environmental Risk Assessment for Pesticides (LERAP) permits a narrower buffer zone, or within 1m of the top of a ditch which is dry at the time of application. DO NOT ALLOW DIRECT SPRAY from hand-held sprayers to fall within 1m of the top of the bank of a static or flowing waterbody. Aim spray away from water.

**Storage and disposal**

- KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDING STUFFS.

- KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place.

- KEEP OUT OF REACH OF CHILDREN.

- RINSE CONTAINER THOROUGHLY by using an integrated pressure rinsing device or manually rinsing three times. Add the washings to the spray tank at the time of filling and dispose of container safely.

- DO NOT RE-USE EMPTY CONTAINERS.

- DO NOT RE-USE CONTAINER FOR ANY PURPOSE.

**PROTECT FROM FROST** 

**SHAKE THOROUGHLY BEFORE OPENING**

Batch No: [A21 15472]

**DANGER**

- May cause an allergic skin reaction.
- Causes serious eye damage.
- Harmful if inhaled.
- May cause respiratory irritation.
- Suspected of causing cancer.
- Very toxic to aquatic life with long lasting effects.

Avoid breathing spray.

Wear protective gloves/protective clothing/eye protection/face protection.

If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

Immediately call a POISON CENTRE or doctor/physician.

If exposed or concerned: Get medical advice/attention.

Avoid release to the environment.

Dispose of contents/container to a licensed hazardous waste disposal contractor or collection site except for empty clean containers which can be disposed of as non-hazardous waste.

To avoid risks to man and the environment, comply with the instructions for use.

10 Litres
DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

UPL Chlorothalonil is a fungicide recommended for the protection winter and spring wheat and winter and spring barley against a range of diseases in accordance with the statutory conditions. For the best results, UPL Chlorothalonil must be applied in advance of the disease according to a planned programme of disease control. Established infections are not controlled. UPL Chlorothalonil should be used as part of an integrated fungicide management programme with alternative fungicides to give comprehensive disease control.

<th>Rate of use</th>
</tr>
</thead>
<tbody>
<tr>
<td>Winter wheat and spring wheat</td>
<td>Leaf spot, <em>Septoria tritici</em></td>
<td>In the period 1(^{\text{st}}) - 2(^{\text{nd}}) node GS30-32, apply immediately disease appears.</td>
<td>1-2 l/ha in 200 l/ha water</td>
</tr>
<tr>
<td></td>
<td>Glume blotch, <em>Leptosphaeria (syn Septoria) nodorum</em></td>
<td>Normally apply from third node detectable to mid flowering stage (GS33-65). However if disease is present at GS33, it is essential to spray early. Apply within the period GS33-39 for best results. Otherwise apply as soon as disease is anticipated or shows signs of spreading. Late application has a reduced effect. Powdery mildew, if present or likely to occur, should be controlled with a specific mildewicide in a tank-mixture otherwise control of <em>Septoria spp.</em> is likely to be reduced.</td>
<td>Early (from GS33) disease from 1 l/ha High risk situations 2 l/ha in 200 l/ha water</td>

<td>Leaf spot, <em>Septoria tritici</em></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Winter and spring barley</td>
<td>Leaf blotch <em>Rhychosporium secalis</em> – moderate control</td>
<td>For best results apply as soon as disease is seen. Repeat once before the beginning of heading (GS59) if there is severe disease pressure or if there is a risk of leaf spotting.</td>
<td>2 l/ha in minimum 200 l/ha water per application</td>
</tr>
</tbody>
</table>
SPRAY MIXING
Invert the product container several times and shake thoroughly before opening. Add the required quantity of UPL Chlorothalonil to the spray tank already half-filled with water and under agitation. Top up the spray tank with water to the required level and keep under constant agitation before, during and until completion of spraying. Thoroughly clean all equipment after use.

SPRAY APPLICATION
Apply UPL Chlorothalonil as a MEDIUM spray (BCPC definition) to dry crop foliage when rain is not expected until the spray has dried. Increase the volume of water in line with crop growth using the maximum spray volume when the vegetation is most dense. Spray evenly and ensure thorough even coverage of the crop foliage.

Conditions of Supply
All goods supplied by us are of high grade and we believe them to be suitable but, as we cannot exercise control over their storage, handling, mixing or use, or of the weather conditions before, during and after application, which may affect the performance of the goods, all conditions and warranties, statutory or otherwise, as to the quality or fitness for any purpose of our goods are excluded, and no responsibility will be accepted by us or resellers for any failure in performance, damage or injury whatsoever arising from their storage, handling, application or use. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in the use of such goods.
